

ETSB4000

Traction Tapes

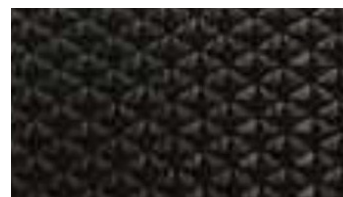

Description

The ETSB4000 consists of a specially treated fabric covered with a silicone coating. This surface is highly resistant to sticky surfaces, yet provides a reliable “non-slip” effect on smooth substrates. The non-slip properties are maximized by the smooth surface.

Applications

The ETSB4000 is specially designed for roller wrapping applications. In many cases, a new covering may be applied without removing the roller from the machine. Industries include:

- Printing industries
- Textile industries
- “Focus” label printing machinery
- General, web-based processing & converting industries

Technical Details

PROPERTIES	VALUE
Total thickness	0,95 mm (\pm 0,1mm)
Standard length*	25 meter
Standard width*	50 and 100 mm
Texture of the silicone	Dimpled
Color of the silicone	Black
Special finish	Self-adhesive

* other lengths and widths upon request!

Storage

Clean and dry in a well ventilated area, preferably at a temperature between 15°C and 25°C.
